

Modular Spreader Beams

LGUK specialises in the hire of equipment to the crane industry. Our range of Lifting Spreader Beams ranges from 5 tonnes upto 400 tonnes, in lengths of 1m upto 22 metres.

Our beams can be built up to any length in increments of 0.25 meters and are supplied with droplinks.

The beams bolt together on site for easy transportation, shackles are required for the top and bottom of the beam.

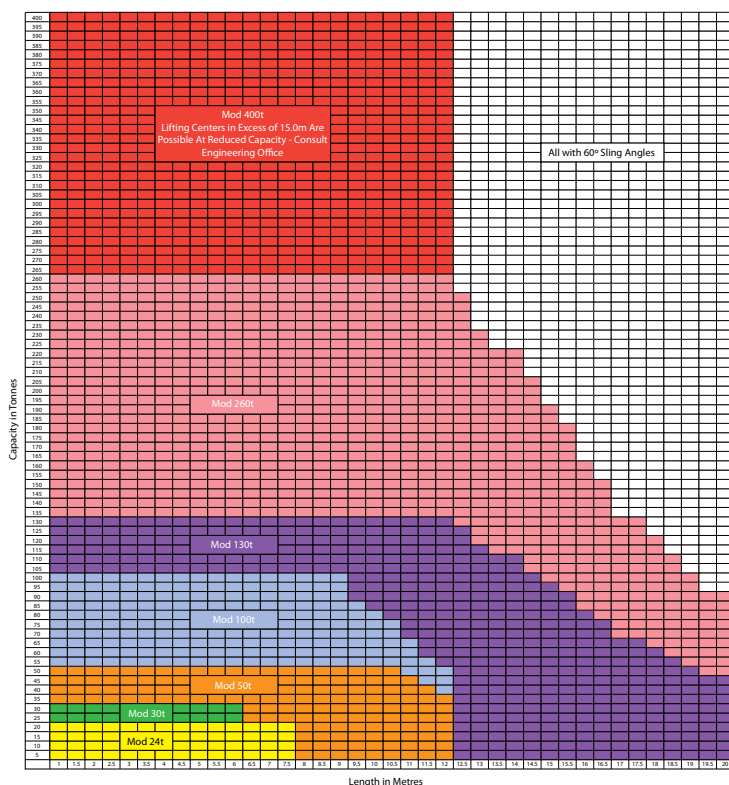

Please see page 5 for our range of shackles.

Product Code	Description	SWL	Standard Length	Maximum Length	1st Day	Extra Day	Per Week
HMB5T3M	Modular Spreader Beam	5t	3m	12m	£34.50	£12.50	£64.50

SWL Data Chart

SAFETY NOTICE : It is essential that the correct bolts are used for modular beams (as supplied) and that they are torqued up to the correct setting. **DO NOT UNDER ANY CIRCUMSTANCES** use any bolts other than those supplied. In addition the sling's used on the top of the beams must be the correct length to maintain suitable sling angles.

Roof Sheet / Panel Lifting Beam

Our roof sheet lifting beams have lifting points at 1.8 metre intervals allowing web slings to cradle roof sheets whilst avoiding bending or crushing. The beam can be built up in lengths from 6 metres upto 42 metres.

- Breaks down into 3m sections for easy transportation.
- Can be used at any working length in 3m increments.

Product Code	Description	SWL	Length	Price per metre per week
HRSB3T6M	Roof Sheet Lifting Beam	3t	6m	£22.70
HRSB3T12M	Roof Sheet Lifting Beam	3t	12m	£22.70
HRSB3T18M	Roof Sheet Lifting Beam	3t	18m	£22.70
HRSB3T24M	Roof Sheet Lifting Beam	3t	24m +	Price on Application

Do not forget to book your shackles and webbing slings to be used with your beam

Cruciform Lifting Beams

Cruciform Beams can be utilised where a vertical lift from beam to load is required over 4 lifting points. Various sizes & SWL's are available, please call to discuss your requirements.

Product Code	Description		1st Day	Extra Day	Per Week
HCFB	Cruciform 4 point Lift Beam	Please call to discuss requirements	POA	POA	POA

:: VARIOUS DIMENSIONS AVAILABLE ::

NEW FOR 2009 : Adjustable Single Point Lifting Beams

These adjustable beams have a fixed point on top and moveable drop links on the underside. They are ideal for situations where loads of varying physical sizes need lifting or where lifting points are unusual distances apart.

Product Code	Description	SWL	Length	Per Week
HALB5T	ADJ Lift Beam	5t	2m - 4m	£55.00
HAL10T	ADJ Lift Beam	10t	0.7m - 2.5m	£120.00

:: LIFTING CENTRES CAN BE ADJUSTED TO ANY LENGTH ::

NEW FOR 2009 : Fixed Single Point Lifting Beams

Lifting beams with a single central point on top and two fixed points on the bottom.

Built for situations where a vertical pull is required but where headroom is restricted.

Product Code	Description	SWL	Per Week
HSPLB10T6M	Single Point Beam	10t	£115.00
HSPLB20T6M	Single Point Beam	20t	£145.00
HSPLB33T6M	Single Point Beam	33t	£225.00

Note : Price based on 6m working length, please call ref other sizes available.

NEW FOR 2009 : Multi Point Lifting Beams

These Multipoint beams are either 6 metres or 12 metres long and have lifting points at 2 metre intervals along the bottom. They are ideal for lifting fragile but heavy items that require lifting on several points.

Other sizes available upon request.

Product Code	Description	SWL	Per Week
HMPB45T	Multipoint Beam	45t	£440.00

Note : Price per 6m length of beam (max 12m).

• Got an unusual lift and struggling to find the gear to do the job - why not get LGUK to carry out a **FREE Site Inspection** and help you plan your job?

NEW FOR 2009 : Lifting Under Beams

Under beams are used to cradle loads to allow safe and easy lifting of items such as pre cast bridge sections. Both heavy and lightweight versions are available in varying lengths for lifting anything from caravans to bridge sections !
